

# NOTICE OF WEED CONTROL APPLICATION

**Date of Application:** November 4-7, 2025

**Location:** Reverence Park

**Reason for Application:** A pre-emergent herbicide for weed control in planters.

**Product Manufacturer Name:** The Andersons 0.48% Barricade on DG Pro

-EPA registration no. 9198-214

-Active ingredients: Prodiamine

-Precautionary statement: May cause eye irritation. May cause respiratory irritation.

**\*No applications within 25 feet of playgrounds**

**\*See attached label and SDS sheet**

**\*Dates are subject to change due to weather**

### PRE-EMERGENT WEED CONTROL

FOR LAWNS & LANDSCAPE ORNAMENTALS

Dispersing Granule Technology

Controls over 30 grassy and broadleaf weeds

Small particle formulation provides  
more particles per square inch

ACTIVE INGREDIENT:  
Prodiamine\*.....0.48%  
OTHER INGREDIENTS.....99.52%  
Total.....100.00%  
\*(CAS No. 29091-21-2)

EPA Reg. No. 9198-214  
EPA Est. No. 9198-OH-1M, 9198-OH-2B, 9198-AL-001A,  
9198-IN-3S  
Underlined letter is first letter used in run code.

NET WEIGHT 50.00 LBS (22.68 KG)  
COVERS UP TO 16,100 SQ. FT.

PROFESSIONAL TURF PRODUCTS

# 0.48% BARRICADE® ON DG PRO®

PRECAUTIONARY STATEMENTS

CAUTION

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

WPS USES:

- Applicators and other handlers:
- Long sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash all PPE separately from other laundry.

NON-WPS USES:

Mixers and loaders who handles this pesticide for any use NOT covered by the Worker Protection Standard (40 CFR Part 170) – in general, only agricultural-plant uses are covered by the WPS– must wear:

- Chemical-resistant gloves

Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash all PPE separately from other laundry.

ENGINEERING CONTROLS:

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 (d) (4-6)), the handler PPE requirements may be reduced or modified as specified in the WPS.

**USER SAFETY RECOMMENDATIONS:**  
Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- After handling this product, immediately wash the outside of gloves before removing them, then remove gloves and all other PPE. Immediately wash thoroughly and change into clean clothing.

**FIRST AID**  
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contacts, if present, after the first 5 minutes; then, continue rinsing. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-757-8951 for emergency medical treatment information.

**ENVIRONMENTAL HAZARDS**  
This product has low solubility in water. At the limit of solubility, this product is not toxic to fish. However, at concentrations substantially above the level of water solubility, it may be toxic to fish.

Aquatic Organism Advisory Statement: Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment wash waters.

If material is spilled, contain and sweep up material or spill for disposal or reuse per label instructions. Wash cleanup equipment to prevent contamination elsewhere. Excess quantities above normal application rates could result in damage to plants subject to spill. Water- in remainder, disc under or cover with layer of soil, or leave exposed to sunlight, as deemed appropriate to the situation.

Non-Target Organism Advisory Statement: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize drift.

**DIRECTIONS FOR USE**  
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**AGRICULTURAL USE REQUIREMENTS**  
Use this product only in accordance with its labeling and with the Workers Protection Standard 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

Exception: If the product is soil injected or soil incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Waterproof gloves
- Shoes plus socks

**NON-AGRICULTURAL USE REQUIREMENTS**  
The requirements in this box apply to use of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The Worker Protection Standard applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried or dusts have settled.

**WEED RESISTANCE MANAGEMENT**  
For resistance management, this product is a Group 3 herbicide. Any weed population may contain or develop plants naturally resistant to this product and other Group 3 herbicides. The resistant biotypes may dominate the weed population if these herbicides are used repeatedly in the same field. Appropriate resistance management strategies should be followed.

To delay herbicide resistance take one or more of the following steps:

- Rotate the use of this product or other Group 3 herbicides within a growing season sequence or among growing seasons with different herbicide groups that control the same weeds in a field.
- Adopt an integrated weed-management program for herbicide use that includes scouting and uses historical information related to herbicide use and crop rotation, and that considers tillage (or other mechanical control methods), cultural ( e.g., higher crop seeding rates; precision fertilizer application method and timing to favor the crop and not the weeds), biological (weed-competitive crops or varieties) and other management practices.
- Scout before and after herbicide application to monitor weed populations for early signs of resistance development. Indicators of possible herbicide resistance include: (1) failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds; (2) a spreading patch of non-controlled plants of a particular weed species; (3) surviving plants mixed with controlled individuals of the same species. If resistance is suspected, prevent weed seed production in the affected area by an alternative herbicide from a different group or by a mechanical method such as hoeing or tillage. Prevent movement of resistant weed seeds to other fields by cleaning harvesting and tillage equipment when moving between fields and planting clean seed.
- If a weed pest population continues to progress after treatment with this product, discontinue use of this product and switch to another management strategy or herbicide with a different mode of action, if available.
- Contact your local extension specialist or certified crop advisors for additional pesticide resistance- management and/or integrated weed-management recommendations for specific crops and weed biotypes.

**WHERE TO USE**  
This product is a preemergence herbicide that provides residual control of many grass and broadleaf weeds in:

- established turfgrasses (excluding golf course putting greens), lawn and sod nurseries
- container, field-grown, and landscape ornamentals
- established perennial and wildflower plantings
- christmas tree farms

**HOW THIS PRODUCT WORKS**  
This product controls susceptible weeds by preventing growth and development of newly germinated weeds. Weed control is most effective when product is watered-in, within 2 weeks, by at least 0.5 inch of rainfall or irrigation.

APPLICATION DIRECTIONS  
ESTABLISHED TURF/LAWNS

1) For best results this product must be applied prior to crabgrass germination. To determine the suitable timing for your specific region please consult the map below.

2) Select a properly calibrated turf spreader and adjust the rate in accordance with the spreader settings listed below. Most established lawns can achieve season-long control of summer annual weeds at the low or medium rated listed below. For spreader models not located below, please refer to The Andersons website for further details.

| SPREADER SETTINGS                                                                                                           |              |                   |                       |                          |                       |                        |
|-----------------------------------------------------------------------------------------------------------------------------|--------------|-------------------|-----------------------|--------------------------|-----------------------|------------------------|
| These suggested spreader settings are not intended to replace calibration. Calibrate your spreader before applying product. |              |                   |                       |                          |                       |                        |
| 50 lbs. treats 16,000 sq. ft. at 135 lbs. product/acre - (31 lbs./1,000 sq. ft. rate)                                       |              |                   |                       |                          |                       |                        |
| 50 lbs. treats 13,600 sq. ft. at 156 lbs. product/acre - (33.5 lbs./1,000 sq. ft. rate)                                     |              |                   |                       |                          |                       |                        |
| 50 lbs. treats 10,400 sq. ft. at 208 lbs. product/acre - (42.7 lbs./1,000 sq. ft. rate)                                     |              |                   |                       |                          |                       |                        |
| 50 lbs. treats 6,900 sq. ft. at 312 lbs. product/acre - (71 lbs./1,000 sq. ft. rate)                                        |              |                   |                       |                          |                       |                        |

3) For best results the product should be activated with 0.5 inches of irrigation following application. Do not apply this product to creeping bentgrass mowed to less than 0.5 inches in height.

**FURTHER DETAILS ABOUT RATES OF APPLICATION**  
This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. Depending on your turf type, please refer to the table below for the maximum amount of product that can be applied in a single growing season.

Maximum use rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied. The low rate will provide 7 months of control and the medium rate will provide 8 months of control. Higher rates will control weed seeds longer but be careful as a longer residual will also hinder future over-seeding of desired turf species. Additionally, some species can be sensitive to dosage. Please refer to the maximum annual rates below.

**MAXIMUM ANNUAL RATES**  
This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate given in the following table.

**MAXIMUM APPLICATION RATE OF THIS PRODUCT PER CALENDAR YEAR BY TURF GRASS SPECIES\***

| Turf Species                                                                                                                             | Lbs. a/a | Lbs. Product/A | Lbs. Product/1,000 sq. ft. |
|------------------------------------------------------------------------------------------------------------------------------------------|----------|----------------|----------------------------|
| Bermudagrass <sup>1</sup> , Bahiagrass, Centipedegrass, Seashore Paspalum, St. Augustinegrass, Tall Fescue (including turf-type), Zoysia | 1.5      | 312            | 71                         |
| Buffalograss, Kentucky Bluegrass, Perennial Ryegrass                                                                                     | 1.0      | 208            | 4.7                        |
| Creeping Red Fescue                                                                                                                      | 0.75     | 156            | 3.5                        |
| Creeping Bentgrass                                                                                                                       | 0.65     | 135            | 3.1                        |

\*These are the maximum rates per calendar year by species limitations.

\*May be used on newly sprigged or plugged Bermudagrass at rates not to exceed 100 lbs./acre or 2.4 lb./1,000 sq. ft. Newly sprigged or plugged Bermudagrass sods not being temporarily retained. Suppression only of Fescue, Goosegrass and Rescues due to reduced product rates used in springing situations.

Use higher rates of this product to achieve higher levels weed control for each turf type, but do not exceed the maximum application rates specified in the Maximum Annual Rates Table.

**WEEDS CONTROLLED**  
When used at the recommended rates this product will control:

|                                            |                                 |                                |
|--------------------------------------------|---------------------------------|--------------------------------|

|                                            | Pigweed                         |                                |

<sup>1</sup>In areas where Poa annua is a winter annual, apply this product in approximately August or September to established, non-overseeded turf before Poa annua seeds germinate.

<sup>2</sup>In many areas a single application of 3.1 to 71 lbs./1,000 sq. ft. (35-312 lbs./A) of this product will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control may be obtained by making an initial application of 3.1 to 4.7 lbs./1,000 sq. ft. (35-208 lbs./A) followed after 60 to 90 days by a application at doses that would not exceed those given in the Maximum Application Rates Table above.

<sup>3</sup>Applications for this weed should be made in late summer, fall, or winter prior to germination.

\*Suppression only.

Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf species. All applications must be made prior to germination of the weed seeds.

**WHEN TO APPLY AFTER OVERSEEDING TURF**  
Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil.

**WHEN TO OVERSEED AFTER APPLICATION - ALL STATES\***  
This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the table below for best overseeding/reseeding results.

| APPLICATION RATE FOR THIS PRODUCT |        |      | INTERVAL BEFORE OVERSEEDING |            |        |
|-----------------------------------|--------|------|-----------------------------|------------|--------|
| Lbs./1,000 sq. ft.                | Lbs./A | ai/A | North                       | Transition | South  |
| 2.3                               | 104    | 0.50 | 4 mo.                       | 4 mo.      | 4 mo.  |
| 3.1                               | 135    | 0.66 | 5 mo.                       | 4 mo.      | 4 mo.  |
| 3.5                               | 156    | 0.74 | 6 mo.                       | 5 mo.      | 5 mo.  |

| 5.4                               | 237    | 1.14 | -                           | -          | 9 mo.  |
| 6.1                               | 270    | 1.30 | -                           | -          | 10 mo. |
| 7.1                               | 312    | 1.50 | -                           | -          | 12 mo. |

\*Note: In AZ, CA, WA and TX, the overseeding interval can be shorter in established bermudagrass that has been overseeded with perennial ryegrass. See the next section "Poa Annua Control in Established Bermudagrass Overseeded with Perennial Ryegrass (AZ, CA, WA, and TX ONLY)".

**POA ANNUA CONTROL IN ESTABLISHED BERMUDAGRASS OVERSEEDED WITH PERENNIAL RYEGRASS (AZ, CA, WA, AND TX ONLY)**  
Use on golf courses (excluding golf course putting greens) and lawns when overseeding with perennial ryegrass (minimum seed rate of 350 lbs./A).

**HOW MUCH AND WHEN TO APPLY**

| AMOUNT TO APPLY | WHEN TO APPLY | EXPECTED CONTROL                                                                                                     | USE PRECAUTIONS                                                                |
|-----------------|---------------|----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| Lbs./Acre       | Lbs./1,000    |                                                                                                                      |                                                                                |
| 78 - 135        | 1.8 - 3.1     | 6 to 8 weeks before ryegrass overseeding                                                                             | One application for 70% or greater control of Poa annua                        |
|                 |               | Second application 4-6 weeks after over-seeding date or when perennial ryegrass roots are in the second inch of soil | Second application should enhance the residual under normal weather conditions |

**USE PRECAUTIONS**  
The following precautions apply to the use of this product in turf grasses and lawns:

- Application of this product may thin emerged annual bluegrass and newly over seeded grasses.
- Do not apply to over seeded turf within 60 days after seeding or until after the second mowing, whichever is longer.
- Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil.
- Do not apply to newly set sod until the following year.
- Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury. Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control.
- Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass, or annual bluegrass (Poa annua) are desirable species.

**LANDSCAPE ORNAMENTALS**  
This product may be applied for residual preemergence weed control in ornamentals (including established perennial and wildflower plantings).

**USE RATES**  
Apply this product at 3.1 to 71 lbs./1,000 sq. ft. (35 to 312 lbs./A) in fall and/or spring. Use higher rate of application for longer control periods. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rate of 71 lbs./1,000 sq. ft. (312 lbs./A).

**APPLICATION TIMING AND INFORMATION**  
This product is a preemergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inch) mechanical incorporation, prior to weed seed germination and within 14 days following application.

Best weed control is obtained when this product is applied to soil free of clods, weeds and debris such as leaves and mulch. Prior to application of this product, control existing vegetation by hand weeding, cultivation or the use of an appropriate postemergence herbicide.

Apply this product to dry foliage only. Overhead irrigation or rainfall soon after application will wash granules off plant foliage and achieve this product in the soil.

**TOLERANT ORNAMENTAL SPECIES**  
This product will not harm most trees, shrubs, vines, and flowers. The species listed on the next page are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface. This product may be applied over the top of these species.

When plants are under stress (such as heat, drought, or frost damage) some cultivars of listed plants may be sensitive to this product.

| Italian Cypress                             | Trailing African Daisy                 | Greater Periwinkle, Vinca                     |
| White Trailing Ice Plant                    | Sourwood                               | Common Periwinkle, Vinca                      |
| Couper Pine                                 | Tree Peony                             | Grape*                                        |
| Larkspur: Blue Elf                          | Fourtain Grass (Dwarf)                 | Old Fashioned Wiegela                         |
| Dianthus, Madiden Pinkis 'Zing'             | Avocado*                               | Spanish Bayonet, Yucca                        |
| Cheddar Pink                                | Fraser's Photinia (Redtip)             | Adam's Needle, Yucca                          |

\*Do not use on food producing trees, vines, or plants.

\*\*Not for use on container growing plants.

**VEGETATION MANAGEMENT**  
This product may be applied to soil surfaces for preemergence control of many grass and broadleaf weeds in non-cropland areas on or surrounding:

- Non-crop areas on or surrounding managed rights-of-way for transportation systems and utilities (including roadways, roadides, railways & equipment yards)
- Facilities including substations, tank farms, pumping stations, parking and storage areas and ungrazed fencerows

Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inch) mechanical incorporation, prior to weed seed germination and within 14 days following application.

Apply this product at 3.1 to 71 lbs./1,000 sq. ft. (35 to 312 lbs./A) in fall and/or spring. Use higher rate of application for longer control periods. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rate of 71 lbs./1,000 sq. ft. (312 lbs./A).

**STORAGE AND DISPOSAL**  
Do not contaminate water, food, or feed by storage or disposal.

**Storage:** Store in original container away from fertilizer, feed, or food stuffs and separated from other pesticides.

**Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Completely empty container into application equipment. Then dispose of empty bag or box in a sanitary landfill or at an incineration facility, or, if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

**IMPORTANT: READ BEFORE USE:**  
Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:

**WARRANTY DISCLAIMER AND LIMITATION OF LIABILITY:**  
Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions. Manufacturer makes NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. To the extent consistent with applicable law, it is Manufacturer's intent to LIMIT ANY LIABILITY FOR SPECIAL, CONSEQUENTIAL OR INCIDENTAL ECONOMIC DAMAGES to refund of purchase price or replacement of product, at Buyer's choice. To the extent consistent with applicable law, Manufacturer DISCLAIMS ANY LIABILITY FOR COMPENSATORY OR OTHER DAMAGES ARISING OUT OF ANY USE CONTRARY TO LABEL DIRECTIONS. Use contrary to label directions is not permitted.

**LEGAL RIGHTS:**  
THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS; YOU MAY HAVE OTHER RIGHTS THAT VARY FROM STATE/JURISDICTION TO STATE/JURISDICTION.

Product of U.S.A.

## THE ANDERSONS PROFESSIONAL TURF PRODUCTS 0.48% BARRICADE® HERBICIDE ON DG PRO®

### SAFETY DATA SHEET

CURRENT AS OF: 5/20/24

#### SECTION 1: PRODUCT / SUPPLIER IDENTIFICATION

PRODUCT CODE: 10005671, 10005672, 10005669, 10005674, 10005670, 10005668, 10003332, 10007835, 10007773, 10007838, 10007780, 10009548

PRODUCT NAME: THE ANDERSONS PROFESSIONAL TURF PRODUCTS 0.48% BARRICADE® HERBICIDE ON DG PRO®

PRODUCT USE: Fertilizer/Herbicide

MFR INFO: The Andersons, Inc.  
PO Box 119  
Maumee, Ohio, USA 43537

FOR EMERGENCY: (800) 757-8951  
FOR INFORMATION: (419) 893-5050

#### SECTION 2: HAZARDS IDENTIFICATION

##### HAZARD SYMBOLS / STATEMENTS:

**WARNING**

**CAUSES EYE IRRITATION  
MAY CAUSE RESPIRATORY IRRITATION**

##### HAZARD CLASSIFICATIONS:

**EYE IRRITATION**

**SPECIFIC TARGET ORGAN TOXICITY**

**- SINGLE EXPOSURE**

##### CATEGORY

2B

3

##### INTERPRETATION

Causes eye irritation

Causes irritation to respiratory tract

##### PRECAUTIONARY STATEMENTS:

- **KEEP OUT OF REACH OF CHILDREN**
- **READ LABEL BEFORE USE**
- **IF MEDICAL ADVICE IS NEEDED, HAVE PRODUCT CONTAINER OR LABEL ON HAND**
- **CALL A POISON CENTER / PHYSICIAN IF UNWELL**
- **IF ON SKIN, WASH WITH PLENTY OF SOAP AND WATER**
- **IF SKIN IRRITATION OCCURS, GET MEDICAL ADVICE**
- **IF IN EYES, RINSE CAUTIOUSLY WITH WATER FOR SEVERAL MINUTES – REMOVE CONTACT LENSES**
- **IF EYE IRRITATION PERSISTS, GET MEDICAL ADVICE**
- **WASH HANDS AFTER HANDLING**
- **USE ONLY OUTDOORS OR IN WELL VENTILATED AREAS**
- **AVOID BREATHING DUST**
- **IF INHALED, REMOVE TO FRESH AIR AND KEEP AT REST IN A POSITION COMFORTABLE FOR BREATHING**
- **STORE CONTAINER TIGHTLY CLOSED**
- **DISPOSE OF CONTENTS / CONTAINER IN ACCORDANCE WITH NATIONAL / REGIONAL / LOCAL REGULATIONS**

**SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS**

| <b><u>CHEMICAL IDENTITY</u></b> | <b><u>SYNONYM</u></b> | <b><u>CAS NUMBER</u></b> | <b><u>CONCENTRATION (%)</u></b> |
|---------------------------------|-----------------------|--------------------------|---------------------------------|
| Proprietary carrier             | DG Lite               | Not listed               | 95-100                          |

**SECTION 4: FIRST AID MEASURES**

|                    |                                                                                                                                   |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| IF INHALED:        | Move to fresh air and keep comfortable, seek medical attention if unwell.                                                         |
| IF ON SKIN:        | Wash affected areas with soap and water. Seek medical attention if irritation persists. Wash contaminated clothing before re-use. |
| IF IN THE EYES:    | Immediately flush with water for 15-20 minutes, seek medical attention if irritation persists.                                    |
| IF SWALLOWED:      | Rinse mouth. DO NOT INDUCE VOMITING unless directed by a medical professional. Seek medical attention if unwell.                  |
| SPECIAL TREATMENT: | None known                                                                                                                        |
| HEALTH HAZARDS:    | See Section 11                                                                                                                    |

**SECTION 5: FIREFIGHTING MEASURES**

|                                  |                                                                                                |
|----------------------------------|------------------------------------------------------------------------------------------------|
| EXTINGUISHING MEDIA:             | Use media suitable for surrounding fire. No special media required.                            |
| SPECIFIC FIRE HAZARDS:           | When heated to decomposition, this product will emit toxic oxides and ammonia.                 |
| SPECIAL FIREFIGHTING PROCEDURES: | Wear full protective clothing and positive-pressure self-contained breathing apparatus (SCBA). |

**SECTION 6: ACCIDENTAL RELEASE MEASURES**

|                             |                                                                                                                                         |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| SPILL / RELEASE PROCEDURES: | Contain material and place in containers for use as intended, or discard according to Federal, State and Local regulations.             |
| ENVIRONMENTAL PRECAUTIONS:  | Prevent spilled material from entering storm drains or water bodies. If material enters a waterway, notify the appropriate authorities. |
| PROTECTIVE EQUIPMENT:       | Wear PPE according to Section 8                                                                                                         |

**SECTION 7: HANDLING AND STORAGE**

Wash hands after handling material. Do not eat, drink or smoke while handling the material. Do not get in eyes or on skin. Avoid breathing dusts. Not intended for human consumption. Store in a cool, dry, well ventilated area away from incompatible materials.

**SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION**EXPOSURE LIMITS:

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

| <u>HAZARDOUS COMPONENT</u> | <u>OSHA PEL</u>                                                  | <u>ACGIH TLV</u>                                                     |
|----------------------------|------------------------------------------------------------------|----------------------------------------------------------------------|
| DG Lite carrier            | 15 mg/m <sup>3</sup> (total)<br>5 mg/m <sup>3</sup> (respirable) | 10 mg/m <sup>3</sup> (inhalable)<br>3 mg/m <sup>3</sup> (respirable) |

PERSONAL PROTECTIVE EQUIPMENT / PROTECTION MEASURES / CONTROLS:

|                         |                                                         |
|-------------------------|---------------------------------------------------------|
| RESPIRATORY PROTECTION: | NIOSH approved pesticide respirator, if required        |
| EYE PROTECTION:         | Safety glasses with sideshields, goggles, or faceshield |
| SKIN PROTECTION:        | Long sleeves, chemical-resistant recommended            |
| VENTILATION:            | Use with adequate ventilation                           |

**SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

|                        |                                    |
|------------------------|------------------------------------|
| APPEARANCE AND ODOR:   | Tan granular mix, with slight odor |
| pH:                    | Not Applicable                     |
| MELTING POINT:         | Not applicable                     |
| BOILING POINT:         | Not available                      |
| FLASH POINT:           | Not flammable                      |
| EVAPORATION RATE:      | Not available                      |
| FLAMMABLE LIMITS:      | Not applicable                     |
| VAPOR PRESSURE:        | Not available                      |
| VAPOR DENSITY:         | Not available                      |
| SPECIFIC GRAVITY:      | ~0.718                             |
| SOLUBILITY (IN WATER): | Partially soluble                  |
| PARTITION COEFFICIENT: | Not available                      |
| AUTOIGNITION TEMP:     | Not available                      |
| DECOMPOSITION TEMP:    | Not available                      |
| ODOR THRESHOLD:        | Not available                      |
| VISCOSITY:             | Not available                      |

**SECTION 10: STABILITY AND REACTIVITY**

|                                   |                    |
|-----------------------------------|--------------------|
| STABILITY:                        | Product is stable. |
| CONDITIONS TO AVOID:              | None known.        |
| INCOMPATIBILITY:                  | None known.        |
| HAZARDOUS DECOMPOSITION PRODUCTS: | None known.        |

**SECTION 11: TOXICOLOGICAL INFORMATION**

**HEALTH EFFECTS:** May be irritating to the nose and respiratory tract. Skin irritation may result from repeated or prolonged exposure. May also be irritating to the eyes, causing redness and watering.

**CARCINOGENICITY:** None of the ingredients are known / listed carcinogens.

**INGREDIENT TOXICITY RANGES:**

ORAL: > 5,000 mg/kg (prodiamine)

DERMAL: > 2,000 mg/kg (prodiamine)

INHALATION: > 1.8 mg/L (prodiamine)

**SECTION 12: ECOLOGICAL INFORMATION**

Long term degradation products may arise. Products of degradation are not expected to be hazardous.

**SECTION 13: DISPOSAL CONSIDERATIONS**

Use product for intended purpose where possible. Dispose of in accordance with all national, regional / state, and local regulations.

**SECTION 14: TRANSPORT INFORMATION**

This product is not regulated as a transportation hazard.

**SECTION 15: REGULATORY INFORMATION**

SARA SECTION 311 / 312: ACUTE HAZARD

**SECTION 16: OTHER INFORMATION**
