### For use as a Desiccant or Harvest Aid

**SUPPRESS® Herbicide EC** can be used as a desiccant on pulse crops\*, including legumes\*, grains\*, alfalfa\*, and root and tuber vegetables (such as potatoes). To achieve the desired results, use the higher application rates. Refer to application table on page 8.

\*Not for use in California

## MIXING INSTRUCTIONS AND APPLICATION RATES

**SUPPRESS® Herbicide EC** is a non-selective, post-emergent, foliar herbicide for use in and around all food and non-food crop areas. It can also be used in non-agricultural and industrial use sites. **SUPPRESS® Herbicide EC** works best on newly emerged weeds. For more mature weeds, use the higher application rates (6% to 9%) with up to 100 gallons of water per acre. For maximum weed control, apply **SUPPRESS® Herbicide EC** directly on the targeted weeds. Use adequate spray solution volume to ensure thorough weed coverage. **SUPPRESS® Herbicide EC** must be sprayed in a manner to avoid drift, such as applying with hooded spray equipment, to prevent drift damage to the crop.

## APPLICATION RATES:

Use the lower use rate range for young, succulent and actively growing weeds and the higher rate for weeds greater than six inches in height. Use the highest rate for perennial weeds when the plants have “hardened.”

- **Use a 3% solution** for control of annual weeds.
- **Use a 6% solution** for burndown of perennial herbaceous plants and weeds in later stage of growth.
- **Use a 9% solution** when maximum vegetative burndown (for weeds such as field bindweeds and sedges), edging, or foliar trimming is desired.

### Sucker Control\*:

Use directed spray of 6% to 9% solution when applying **SUPPRESS® Herbicide EC** to eliminate tender suckers. Higher rates (9%) will be needed for mature (lignified) suckers.

### Desiccation/Harvest Aid:

Apply **SUPPRESS® Herbicide EC** when unwanted vegetation needs to be removed and crops have stopped growing. Spray solution as a broadcast application over targeted crops and weeds. Avoid spray drift to adjacent crops. To ensure full burndown, apply **SUPPRESS® Herbicide EC** at least 48 hours before harvest. Application crops include pulse\*, potato and other tubers.

Repeat applications as required to maintain desired level of weed control and to control plants emerging from seed and underground parts.

*\*Not for use in California*

## APPLICATION RATES

Desired Volume of Spray Solution (gallons of water)	Amount of <b>SUPPRESS® Herbicide EC</b> per Volume of Water (Volume/Volume)		
	3% Solution	6% Solution	9% Solution
1	4 fl oz	8 fl oz	12 fl oz
3	12 fl oz	24 fl oz	36 fl oz
25	96 fl oz	1.5 gal	2.25 gal
50	1.5 gal	3 gal	4.5 gal
70	2.1 gal	4.2 gal	6.3 gal
100	3 gal	6 gal	9 gal

## **MIXING INSTRUCTIONS:**

Fill sprayer tank with half of the recommended water, then add the appropriate amount of **SUPPRESS® Herbicide EC**. Fill tank with the remaining amount of water. When spraying the solution, **USE CONTINUOUS AGITATION UNTIL ALL SPRAY SOLUTION HAS BEEN APPLIED**. Apply spray solution in properly maintained and calibrated equipment capable of delivering the desired volumes. Apply spray solution as needed to control newly emerged weeds. Use spray solution within 4 hours of mixing.

**Spray Water pH:** For spray water with pH greater than 7, adjust to pH 6 or below prior to the addition of **SUPPRESS® Herbicide EC**. The dilution water can be adjusted using an acidifier such as **BioLink® Acidifier**.

**Surfactants:** Do not tank mix **SUPPRESS® Herbicide EC** with silicone-based surfactants. Non-ionic surfactants are not recommended.

**SPRAY EQUIPMENT:** Apply **SUPPRESS® Herbicide EC** using hand-held equipment, boom sprayers, pressure sprayers, and hose-end sprayers. Only protected handlers may be in the application area. Always clean application equipment, including o-rings, thoroughly after each use.

Do not apply this product by aerial application. Do not apply when wind conditions favor movement of spray away from the site of application. Avoid spray drift to non-target plants when using electrostatic sprayers. When applying this product in a broadcast application, utilize a hooded sprayer, shielded or other spray equipment that prevents the movement of spray away from the target weeds. Utilize nozzles that are designed to produce large spray droplets to prevent drift onto crop.

**DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IRRIGATION SYSTEM.**

**ADDITIONAL PRECAUTIONS:** Do not apply to weeds when wet from dew, rain or water. Do not water within 4 hours after application. Do not apply if rainfall is expected within 4 hours of spray. For maximum burndown, complete coverage is necessary.

**DO NOT APPLY TO RICE FIELDS WHEN WATER IS PRESENT OR FIELD IS FLOODED. ENSURE ADEQUATE VENTILATION WHEN SPRAYING THE PRODUCT IN ENCLOSED AREAS SUCH AS GREENHOUSES.**

**COMPATIBILITY:**

Do not tank mix with silicone-based surfactants. Non-ionic surfactants are not recommended. Conduct a compatibility test when you plan to mix **SUPPRESS® Herbicide EC** with other products. To determine the physical compatibility of **SUPPRESS® Herbicide EC** with other products, use a jar test. Using a quart jar, add the proportionate amounts of the products to approximately one quart of solution. Add dry formulations first, then aqueous flowables, and then emulsifiable concentrates last. Agitate well.

After thorough mixing, allow this mixture to stand for 5 minutes. If the combination does not form a precipitate and can be readily remixed, it is physically compatible. Once compatibility has been confirmed, use the same order of addition for adding products to the spray tank. Follow the more restrictive labeling requirements of any tank mix partner. Do not tank mix with products which prohibit tank mixing. Treat a small test plot if new combinations of products are being used for the first time.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store SUPPRESS® Herbicide EC in a cool place out of direct sunlight. Do not freeze.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
